To Whom It May Concern:

XCOR has used Golan filters (<http://www.golanproducts.com/filters.html>) in our rocket engine test stands, and also in flight hardware on the EZ-Rocket aircraft which is powered by our liquid fuel rocket engines. They have given us excellent service and we will certainly use more of them in the future. These filters are a useful product at an outstanding price, and I recommend them highly.

Sincerely,  
Doug Jones, Rocket Engineer  
XCOR Aerospace
